

Selected Topics in Visualization and Animation
EE-049003 — Fall '09

Paper Selection
Due (email to me): October 28th 2009

Choose a topic you would like to work on, and within this topic choose a paper you would like to talk about. Suggestions of topics and papers can be found in the course web page.

The presentation of the paper should include not only a summary of the paper but also your evaluation. You should discuss the paper's strengths and weaknesses by considering the following issues:

- Does the paper make reasonable assumptions?
- How novel is the solution?
- Is the solution technically sound?
- How well is the solution evaluated?
- Writing level: is the paper clearly written? Is it self-contained?
